The image shows two windows from a proxy leeching application. The left window, 'Automated Proxy Leecher 1.3', has a 'Start' button and a counter '15'. It lists several sites with their proxy counts: 'http://proxyserverlist.blogspot.fi' (3596), 'http://eliteproxy.blogspot.com' (80), 'http://proxieblog.blogspot.com' (87), 'http://googleproxies.blogspot.in' (887), 'http://www.socksv6.com' (699), and 'http://vinasocks.blogspot.com' (Timeout). The right window, 'Proxy Analyzer', has a 'Start' button and a counter '20'. It shows a 'ProxyJudge' URL: 'http://blackmarket.jp/cgi-bin/jeno/env/prxdg.cgi'. The 'Bots Timeout in' is set to 8 seconds, and the 'Reply Count' is [Good=1][Bad=47][Timeouts=37][Retries=0]. A table lists proxies with their IP addresses, ports, and replies. The status bar at the bottom indicates '[85 / 20064] - 0% Complete' and a speed of '10.65 0.76'.
